

SILVER FLEXSUB

Triad's new FlexSubs allow you to add bass to an audio system with the very least amount of visual impact. We named them "FlexSub" because of their installation flexibility. The Silver FlexSub is a version of Triad's powerful Silver Sub that has been configured to install behind a ceiling, cabinet toekick, baseboard, wall, or crawl space. The bass is channeled through a damped, coiled, expandable, flexible tube that terminates with one of two grills; a very small standard Triad grill, or a vent outlet. If you have access to your attic, basement, crawl space, or the back of a cabinet, the Silver FlexSub enclosure mounts in a hidden area, and all that is seen is a very small grill or vent, which we can paint match for you. All parts and hardware are included.

The Silver FlexSub comes with the new RackAmp 600, which provides control and 600 watts RMS, and a high-performance, long-throw 12" subwoofer driver for solid bass performance. The amplifier installs with the rest of your electronics for your convenience. Where even more bass is desired, multiple Silver FlexSubs may be used, and they'll be virtually invisible. With no big, black boxes on the floor or huge grills in the walls, you can now have great bass in any room without having any impact on your decor!

Category: Subwoofers
Tag: FlexSub

Features

Flexible installation with remote mounting.
Choice of grill or vent register.
Custom paint available.

- Amplifier: Rack (1 space) mountable 600 watt DSP RackAmp.
- Brand new DSP BASH technology.

 - Adjustable Trigger Voltage
 - Adjustable Off Delay
 - Optimize multiple subs for best performance
 - Input Gain matches levels.
 - Delay time aligns subs together for better impact

Enclosure

Fully engineered, Premium MDF enclosure.
Acoustic Suspension.
Powered subwoofer.

Finishes

Triad's Basic, & Custom Finishes are available for this product. The standard finish for this product is White paint. For any other colors, please refer to Triad's Custom Match Finish program for this product. The paint we use is a top quality enamel and is applied with a light pebble finish.

Since all computer monitors and their colors vary, the digital color you see here will be different from the actual product finish.
